FULL-STACK DEVELOPER

Full-Stack Developer with 3+ years of experience designing, building, deploying, and supporting enterprise applications using C#, .NET, Angular, TypeScript, JavaScript, SQL, and REST APIs. Hands-on experience with Microsoft Azure, AWS, Docker, Azure DevOps, GitHub Actions, CI/CD pipelines, cloud deployments, background services, messaging systems, and production monitoring. Skilled in application architecture, API integrations, automated testing, troubleshooting complex production issues, technical documentation, AI-assisted development, and collaborating with business and technical stakeholders to deliver secure, scalable, and maintainable solutions.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Transact-SQL, HTML, CSS, PowerShell

Backend: .NET, ASP.NET Core Web API, Entity Framework Core, LINQ, Background Services, Azure Functions

Frontend & Mobile: Angular, AngularJS, React, React Native, Expo, Responsive UI Development

Cloud & DevOps: Microsoft Azure, AWS, Azure DevOps, Docker, GitHub Actions, CI/CD Pipelines, Cloud Deployments

AWS Services: ECS Fargate, SQS, EventBridge, DynamoDB, CloudWatch, SNS, Terraform and so on.

Databases & Caching: SQL Server, PostgreSQL, MySQL, DynamoDB, Redis

APIs & Integration: REST APIs, Swagger/OpenAPI, Webhooks, Callback APIs, Third-Party Integrations, Message Queues

AI & Intelligent Systems: GitHub Copilot, LLM APIs, Prompt Engineering, RAG, Embeddings, Vector Search, AI Agents, Gemini, Groq, Ollama

Testing: xUnit, NUnit, Moq, Jest, Unit Testing, Integration Testing, Automated Testing

Architecture: Clean Architecture, Microservices, Domain-Driven Design, Design Patterns, Event-Driven Architecture, Dependency Injection

Tools: Git, Visual Studio 2022, VS Code, Postman, Swagger, Jira

Practices: Agile, Scrum, Code Reviews, Production Support, Root-Cause Analysis, Technical Documentation, AI-Assisted Development

PROFESSIONAL EXPERIENCE

CATALIS TECHNOLOGIES CANADA LTD — Edmonton, AB

Software Developer II | Aug 2025 – Present

- Develop, troubleshoot, and enhance enterprise applications using C#, .NET, Angular, TypeScript, REST APIs, SQL, and cloud services.
- Investigate and resolve complex application defects by analyzing API payloads, logs, database records, configuration, and third-party integrations.
- Build secure APIs, background workers, callback services, and event-driven workflows for public-sector and government clients.
- Break solution designs into development tasks, estimate effort, communicate progress and risks, and recommend alternative technical solutions.

- Write unit and integration tests, support CI/CD releases, maintain technical documentation, and provide guidance to newer team members.

Software Developer I | May 2024 – Aug 2025

- Delivered full-stack features and application upgrades using .NET Core, C#, Angular, TypeScript, JavaScript, and SQL.
- Developed responsive user interfaces and secure REST APIs supporting enterprise payment and transaction workflows.
- Provided advanced technical support by troubleshooting backend services, frontend behaviour, databases, APIs, and cloud environments.
- Collaborated with product owners, business analysts, QA testers, developers, and stakeholders in Agile/Scrum teams.
- Used Azure DevOps, Git, Visual Studio, GitHub Copilot, Swagger, Postman, xUnit, and Moq throughout the development lifecycle.

SELECTED PROJECTS

Enterprise Payments Integration Platform

Developed enterprise payment workflows using C#, .NET, Angular, AWS SQS, EventBridge, DynamoDB, Redis, REST APIs, background workers, callback processing, retry policies, structured logging, and automated testing with xUnit and Moq.

AI Agent Task Orchestrator

Built an AI task-processing platform using .NET, Angular, PostgreSQL, AWS SQS, Docker, Gemini and Groq APIs, with task decomposition, background workers, retry handling, execution history, status tracking, and dead-letter queue processing.

RAG Document Intelligence Platform

Developed a document question-answering application using .NET, Angular, Python, FastAPI, PostgreSQL, pgvector, embeddings, vector search, and LLM APIs, supporting document ingestion, semantic retrieval, source citations, and conversation history.

EDUCATION

Post-Graduate Diploma, Full Stack Web Development — MacEwan University, Edmonton | 2023

Post-Graduate Diploma, Mobile Applications Development — Georgian College, Barrie | 2022

Bachelor of Computer Applications — Guru Nanak Dev University, India | 2019
